Notes:

• LLMTDA is a method developed to test heavy metals in food and dietary supplement products. The method is modified from EDA EAM 4.7 and uses similar sample preparation and analytical techniques to those described in EAM. Microwave assisted digestion in mineral acids is used to prepare samples for heavy metal analysis by triple quadrupole inductively coupled plasma mass spectrometry (ICP-MS/MS). LLMTDA is part of the Labs' scope of ISO 17025 accredited methods.
